

BANGKOK INTERNATIONAL DENTAL CENTER

The Dental Professionals

Company Profile

Bangkok International Dental Center (BIDC) is Thailand's award-winning dental center having received the prestigious Prime Minister Export Award for Best Service Provider (Hospital/Clinics) as well as the Bojpo Award for Branding, Quality and Customer Service. BIDC is a leading premier dental center for specialty dental care in dental implants, cosmetic dentistry and invisible orthodontics.

Located centrally in Bangkok, the 7 storey dental complex is one of the largest and most modern dental center in Thailand. The BIDC complex is 4,800 sqm, consisting of over 25 treatment rooms, conference and training facilities, a 30-room boutique hotel, bank as well as restaurant. BIDC has dedicated dental laboratories on-site specializing in aesthetic ceramic teeth lab works.

There are over 70 dentists and dental specialists at BIDC, many of whom are overseas graduates. BIDC dental center uses a specialists referral system. Each portion of an individual's dental treatments is assigned only to dental specialists in that specific field of expertise(s) ensuring comprehensive and proper care for successful results.

BIDC treats over 20,000 patients annually from around the globe. Our reputation is built on a foundation of a professional code of conduct, international standards and quality care to patients.

BIDC is Joint Commission International (JCI) and ISO9001:2008 UKAS certified. Policy controls are in place for pricing and process transparency providing confidence to ensure that the right aesthetic and procedural decisions are made.

BIDC is an official authorized dental implant center in Thailand. Having successfully treated more than 4,000 implant placement, our team of highly experienced implantologists handles major dental implant cases including full mouth rehabilitation and reconstruction cases.

High Sterilization Standards

BIDC views sterilization at its utmost importance. BIDC always provides a safe and clean environment employing evidence-based CDC, WHO and AAMI infection control and patient safety programs. BIDC's building is design specifically with high powered air suction in each treatment room to operate as a dental center. Our dental appliances are individually sealed, autoclaved and dated in separate view packs for each individual patient. Besides standard test checks, additional biological tests are done at BIDC after autoclaving to double verify total sterilization effectiveness.
